

Leased Circuit

Point-to-point leased line networks with dedicated bandwidth for business-critical data and voice applications

Leased Circuit

Point-to-point leased line networks with dedicated bandwidth for business-critical data and voice applications

Benefits:

- Dedicated point-to-point high speed connection
- Keeps businesses protected from costly network outages
- Allows automatic data, video and voice traffic transfer whenever primary connection fails
- Provides always-on backup link
- Up to 5 Mbps download and 4 Mbps upload speeds* for business-critical applications

* Maximum throughput is not applicable for simultaneous download and upload. Maximum throughput for simultaneous download and upload is 4 Mbps receive and 2 Mbps transmit.
