

# Multicasting

Simultaneous delivery of contents from a central location to multiple users

# Multicasting

Simultaneous delivery of contents from a central location to multiple users

## Benefits:

- Enables file distribution from a central location to a group of users, e.g. classrooms and movie theaters
- Supports IGMP V.2 multicast protocol
- Delivers industry standard IP streaming formats, such as Windows Media Player, Real Player and QuickTime
- Nationwide service with uniform Quality of Service (QoS)
